- PROS 2022-113038: On 2022-01-27, the POCC was advised by VIPPD (through Nat Div DIO) of a possible suspect who was armed and planning on attending the trucker convoy in Ottawa. Further investigation revealed that this was an occurrence of "swatting" whereby someone falsely reported the occurrence to attract a showy police attendance at an OnRoute on Hwy 401. Police spoke with the accused suspect who was completely cooperative with police and shaken by the accusation. Report deemed unfounded.

- Police observation has identified what may be a large air compressor being transported on a flat-bed trailer in the convoy.
- Open source research has identified a YouTube channel that appears to be live-streaming police communications (Belleville PS; Ottawa PS; and the OPP) regarding the location and movement of the various convoys. Further open source research located a social media message indicating that the author had been listening specifically to the OPP radio traffic.
- Individuals attending the Ottawa protest may attend one or more hospitals in Ottawa. It is unknown if any individual attending the protest actually has the intent to do so.
- Open source research has captured images of:
 - A flatbed tractor-trailer carrying a pick-up truck and a smaller piece of equipment, possibly a construction light tower, a flat-bed truck carrying another pick-up truck and portable toilets, as well as what may be an excavator being transported by a truck in the convoy. This is the third piece of heavy equipment observed in the convoy. Also, a large boat on a flat-bed trailer and a large all-terrain vehicle being hauled in the convoy.
- In addition to using the s.37 application to communicate, open source research has yielded information to suggest that some convoy participants may also be using SIGNAL.
- s.37
